

Wilson County Emergency Operations Plan

Statement of Approval

This edition of the Wilson County Emergency Operations Plan has been reviewed by the Wilson County Board of Commissioners and, subsequently, approved by the Board, on this, the 9th day of December, 2019, during a regularly scheduled Board meeting.

All Departments, entities, agencies, and individuals, either in the direct employment of Wilson County, contracted to provide emergency response services to Wilson County, or having service agreements with Wilson County and having responsibilities within this plan have participated in the plan update and are hereby authorized and ordered to implement any or all portions of this plan when necessary to protect lives and property during emergencies or major disasters within Wilson County.

Because this is a living document, minor changes to the plan (relating to changes in departmental operations, new equipment or resources, or dispatch protocols) may be made to the plan as needed, based on the needs of the various response entities at the discretion of those entities and with coordination with Wilson County Emergency Management. Dates and times of changes are electronically recorded in the Wilson County Emergency Operations Plan working copy which is maintained by the Wilson County Emergency Management Agency. The plan is accessible to the public on the Wilson County Website.

The next overall review and update of this plan is scheduled for 2024. This edition of the Wilson County Emergency Operations Plan replaces any and all previous existing editions.

Rob Boyette, Chairman, Wilson County Board of Commissioners

Denise Stinagle, Wilson County Manager

Ron Hunt, Assistant County Manager, Clerk to the Board of Commissioners
