EMERGENCY MEDICAL SERVICES

BLS Emergency – BLS Emergency includes provision of medically necessary supplies and services as defined by the State. When transporting these patients, the ambulance must be staffed by an individual who is qualified in accordance with State and local laws as an EMT. BLS emergency is an immediate emergency response in which the ambulance provider/supplier begins as quickly as possible to take the steps necessary to respond to the call.

An ALS assessment does not necessarily result in a determination that the beneficiary requires an ALS level of transport. In the case of an appropriately dispatched ALS emergency service, if the ALS crew completes an ALS assessment, the services provided by the ambulance transportation service provider or supplier are covered at the ALS emergency level, regardless of whether the beneficiary required ALS intervention services during the transport, provided the ambulance transportation itself was medically reasonable and necessary and all other coverage requirements are met.

**Advanced Life Support (ALS) intervention - a procedure that, in accordance with State and local laws, is required to be done by an Advanced EMT or a Paramedic. Application: An ALS intervention must be medically necessary to qualify as an intervention for payment for an ALS level of service.
